

INTERNET SAFETY

Let's have fun and connect with friends on the internet, but let's be sure we are being SMART about our internet usage.

S

AFE - We must make sure we are keeping our information safe while we are online. Your private information includes, your full name, date of birth, phone number, email address and home address. Never share this information online, always keep it private.

M

EET - We should never meet up with friends we have only met online. Strangers can pose as other people online to win over our trust. Always inform a parent or adult when asked by someone online to meet up in person, they will advise you on what to do.

A

CCEPTING - Try not to be too accepting online. There is no need to have thousands of friends on social media. Stay safe and only accept those that you know in real life and are sure of who they are.

R

ELIABLE - You cannot believe everything you read online. There is new information posted online every second so information can quickly become out of date. There is also a lot of misinformation online so we should always be careful and question what we read.

T

ELL - Always tell a responsible adult if you feel uncomfortable about any interaction you have online. If you must question whether something is right or wrong, then it is time to talk to someone about it.

Share love with your friends online by supporting them with a heart on their posts on social media. It's nice to be nice online as well as in person.
